

Paperlynen
Ho.Re.Ca. 2024

I professionisti del monouso nella ristorazione

Dal 1977 Paperlynen Pal Caps offre un'intera gamma di articoli per i professionisti della ristorazione garantendo massima qualità ed offrendo continua innovazione sulla propria gamma prodotti, in sintonia con le sempre mutevoli esigenze di mercato.

Professionals in single use

Since 1977 Paperlynen Pal Caps offers an entire range of items for catering professionals, guaranteeing maximum quality and offering continuous innovation on its product range, in line with the ever-changing market needs.

Ihre Profis für Einwegprodukte

Bereits seit 1977 bietet Paperlynen ein komplettes Sortiment von Einweg-Produkten für professionellen Einsatz im HO.RE.CA Bereich an. Neben der hohen Produktqualität garantieren wir Ihnen laufende Innovationen und Anpassungen des Sortiments basierend auf Marktanforderungen bzw. Ihren Wünschen als Kunde und Anwender.

Dal 1977 insieme ai professionisti Ho.Re.Ca.

Da una intuizione della famiglia Venturi nell'agosto 1977 nasce Paperlynen Pal Caps Srl, azienda che inizia la sua storia importando e distribuendo in Italia indumenti monouso della società inglese Paperlynen Company Ltd (oggi Pal International Ltd). È la prima ad introdurre sul mercato italiano prodotti innovativi, tecnologicamente avanzati ma ancora praticamente sconosciuti.

anche alla possibilità di personalizzare gran parte degli articoli in gamma.

L'impegno di Paperlynen per fornire al cliente il meglio è costante ed è testimoniato dalle certificazioni di cui l'azienda si può fregiare sia per il sistema di gestione (UNI EN ISO 9001:2015); sia per l'impegno verso l'ambiente (UNI EN ISO 14001:2015 e FSC Chain of Custody); sia per la sicurezza dei

Dopo l'introduzione di indumenti monouso, a metà anni Novanta, Paperlynen amplia la propria offerta verso stoviglie monouso e biodegradabili finendo per differenziarsi su tre macro settori che ne hanno determinato il successo: Ho.Re.Ca, Industriale e Sanitario. È in questi anni che Paperlynen introduce - prima sul mercato italiano - piatti biodegradabili in polpa di cellulosa, bicchieri e contenitori in cartoncino alimentare.

Oggi Paperlynen Pal Caps srl, giunta a 45 anni di attività, si pone come azienda di riferimento per gli operatori dei settori Industriale e Ho.Re.Ca, che possono trovare nell'azienda un referente affidabile, specializzato e competente in grado di soddisfare le esigenze più specifiche dei propri clienti, grazie

consumatori (IFS HPC). La catena di controllo sui beni trattati da Paperlynen inizia in estremo oriente dove un incaricato effettua verifiche periodiche "on site" per assicurarsi che sia spedita in Italia solo merce conforme agli standard dell'azienda, la quale, all'arrivo in magazzino, testa a campione i beni in arrivo per escludere qualsiasi difformità. Lo stoccaggio e la spedizione della merce avviene poi per lotto in modo da garantirne la tracciabilità.

Una solida struttura organizzativa coordina non solo gli aspetti dell'approvvigionamento ma anche le certificazioni, l'ambito regolatorio, quello della qualità ed il post vendita per assicurarsi che la soddisfazione del cliente sia sempre il primo presupposto della mission aziendale.

Since 1977 together with Ho.Re.Ca.

From an intuition of the Venturi family in August 1977, Paperlynen Pal Caps Srl was born, a company that began its history by importing and distributing disposable clothing from the English company Paperlynen Company Ltd (now Pal International Ltd) in Italy. It is the first to introduce innovative, technologically advanced but still practically unknown products on the Italian market.

After the introduction of disposable clothing in the mid-nineties, Paperlynen expands its offer towards disposable and biodegradable tableware, ending up differentiating itself on three macro sectors that have determined its success: Ho.Re.Ca, Industrial and Healthcare. It is in these years that Paperlynen introduces - first on the Italian market - biodegradable dishes in cellulose pulp, glasses and food carton containers.

Today Paperlynen Pal Caps srl, having reached 45 years of activity, is a reference company for operators in the Industrial and Ho.Re.Ca sectors, who can find in the company a reliable, specialized and competent contact able to satisfy the more specific needs of its customers, thanks also to the ability to customize most of the items in the range.

Paperlynen's commitment to provide the customer with the best is constant and is testified by the certifications that the company can boast both for the management system (UNI EN ISO 9001: 2015); both for the commitment to the environment (UNI EN ISO 14001: 2015 and FSC Chain of Custody); both for consumer safety (IFS HPC). The chain of control on the goods handled by Paperlynen begins in the Far East where a representative carries out periodic "on site" checks to ensure that only goods that comply with the company's standards are shipped to Italy, which, upon arrival in the warehouse, tests sample the incoming goods to rule out any discrepancies. The storage and shipment of the goods then takes place by lot in order to guarantee their traceability.

A solid organizational structure coordinates not only the procurement aspects but also the certifications, the regulatory sphere, that of quality and after-sales to ensure that customer satisfaction is always the first prerequisite of the company mission.

Seit 1977 zusammen mit Ho.Re.Ca.

Aus einer Intuition der Familie Venturi wurde im August 1977 Paperlynen Pal Caps Srl geboren, ein Unternehmen, das seine Geschichte mit dem Import und Vertrieb von Einwegkleidung der englischen Firma Paperlynen Company Ltd (heute Pal International Ltd) in Italien begann. Es ist das erste Unternehmen, das innovative, technologisch fortschrittliche, aber noch praktisch unbekannte Produkte auf dem italienischen Markt einführt. Nach der Einführung von Einwegkleidung Mitte der neunziger Jahre erweitert Paperlynen sein Angebot auf Einweg- und biologisch abbaubares Geschirr und differenziert sich schließlich in drei Makrosektoren, die seinen Erfolg bestimmt haben: Ho.Re.Ca, Industrie und Gesundheitswesen. In diesen Jahren führt Paperlynen - zuerst auf dem italienischen Markt - biologisch abbaubares Geschirr aus Zellstoff, Gläser und Lebensmittelkartons ein. Heute ist Paperlynen Pal Caps srl nach 45 Jahren Tätigkeit ein Referenzunternehmen für Betreiber in den Bereichen Industrie und Ho.Re.Ca, die im Unternehmen einen zuverlässigen, spezialisierten und kompetenten Ansprechpartner finden, der in der Lage ist, die spezifischeren Anforderungen zu erfüllen seiner Kunden, auch dank der Möglichkeit, die meisten Artikel des Sortiments individuell zu gestalten.

Das Engagement von Paperlynen, dem Kunden das Beste zu bieten, ist konstant und wird durch die Zertifizierungen bestätigt, die das Unternehmen sowohl für das Managementsystem (UNI EN ISO 9001: 2015); sowohl für das Engagement für die Umwelt (UNI EN ISO 14001: 2015 und FSC Chain of Custody); beide für die Verbrauchersicherheit (IFS HPC). Die Kontrollkette der von Paperlynen gehandhabten Waren beginnt in Fernost, wo ein Vertreter regelmäßig "vor Ort" Kontrollen durchführt, um sicherzustellen, dass nur Waren, die den Standards des Unternehmens entsprechen, nach Italien versandt werden, die nach Ankunft im Lager Tests prüfen den Wareneingang, um Abweichungen auszuschließen. Die Lagerung und der Versand der Ware erfolgt dann per Los, um deren Rückverfolgbarkeit zu gewährleisten.

Eine solide Organisationsstruktur koordiniert nicht nur die Beschaffungsaspekte, sondern auch die Zertifizierungen, das regulatorische Umfeld, die Qualität und den After-Sales, um sicherzustellen, dass die Kundenzufriedenheit immer die erste Voraussetzung der Unternehmensmission.

Le nostre certificazioni

Paperlynen non guarda solo alla qualità dei propri prodotti ma anche all'organizzazione e al monitoraggio aziendale. E lo fa partendo dalla selezione dei fornitori e delle materie prime per continuare con il controllo dell'attività produttiva e di formazione del personale al fine di garantire i più alti standard di qualità e per fornire prodotti in linea con le richieste dei clienti più esigenti. L'intera azienda è in costante sviluppo per perseguire un miglioramento continuo anche ricorrendo a certificazioni di autorevoli enti terzi.

Our Certifications

Paperlynen does not only look at the quality of its products but also at the organization and company monitoring. And it does so starting from the selection of suppliers and raw materials to continue with the control of production and staff training in order to guarantee the highest quality standards. The entire company is constantly developing to pursue continuous improvement, also by resorting to certifications by independent third-parties.

Unsere Zertifizierungen

Unser Qualitätsmanagement mit permanenter Überwachung der Organisation und Geschäftsprozesse, qualitätsorientierter Auswahl der Lieferanten und Rohstoffe, laufenden Kontrollen von Produktion und Produktionsstätten, und zielgerichteter Schulung unserer Mitarbeiter gibt Ihnen die Sicherheit Produkte von höchster Qualität gemäß Ihren Anforderungen zu erhalten. Das gesamte Unternehmen entwickelt sich dabei ständig weiter. Unser Ziel ist es für Sie gleichbleibend hohe Qualität zu liefern, innovative Produkte zu entwickeln und uns permanent zu.

UNI EN ISO 9001:2015

Certifica che l'azienda adotta un sistema di gestione che garantisce la qualità dei prodotti e la soddisfazione del cliente.
It certifies that the company adopts a management system that guarantees product quality and customer satisfaction.
Die Firma ist für ihr Managementsystem zertifiziert. Sie garantiert Produktqualität und Kundenzufriedenheit

UNI EN ISO 14001:2015

Certifica che le prestazioni e la politica ambientale dell'azienda son conformi agli standard previsti dai sistemi di gestione ambientale.
It certifies that the company's performance and environmental policy comply with the standards set by the environmental management systems.
Die Firma ist für ihr Umweltmanagementsystem nach den festgelegten Standards zertifiziert.

IFS Household and Personal Care products

Garantisce che la produzione e la fornitura di prodotti non rappresenta alcun pericolo per la salute e/o la sicurezza dei consumatori.
It guarantees that the production and supply of products does not represent any danger to the health and / or safety of consumer.
Garantiert die Produktion und Lieferung von Produkten und enthält keine Gefahr für Gesundheit und / oder Sicherheit der Verbraucher.

FSC® Chain of Custody

La certificazione CoC (Chain of Custody, Catena di Custodia) garantisce l'utilizzo e la rintracciabilità di materiali provenienti da foreste gestite secondo gli standard FSC di responsabilità e sostenibilità.
The CoC certification (Chain of Custody) guarantees the use and traceability of materials coming from forests managed according to FSC standards of responsibility and sustainability.
Die CoC-Zertifizierung (Chain of Custody) garantiert die Nutzung und die Rückverfolgbarkeit von Materialien aus Wäldern, die gemäß FSC Standards bewirtschaftet werden. FSC für Verantwortung und Nachhaltigkeit.

Personalizzazione

Customization ~ Anpassung

La maggior parte dei nostri articoli è personalizzabile con stampe ad uno o più colori con due possibilità: in piccole quantità o con grandi tirature. Contatta i nostri uffici per avere tutti i dettagli.

Most of our items can be customized in one or more colors with two possibilities: in small quantities or with large runs. Contact our offices for all the details.

Die meisten unserer Artikel können in einer oder mehreren Farben mit zwei Möglichkeiten personalisiert werden: in kleinen Mengen oder in großen Auflagen. Kontaktieren Sie unsere Büros für alle Details.

EXPRESS

Il servizio di Paperlynen per personalizzare piccole quantità in modo veloce. Puoi scegliere tra 1, 2, 3 colori per quantità da 1000 a 10000 pezzi.

The Paperlynen service to customize small quantities quickly. You can choose between 1, 2, 3 colors for quantities from 1000 to 10,000 pieces.

Der Paperlynen zum personalisieren kleinerer Mengen. Sie können zwischen 1, 2, 3 Farben und Mengen zwischen 1000 bis 10000 Stück wählen.

STANDARD

Servizio per grandi quantità (minimo 50.000 pezzi dello stesso codice) e per stampe complesse fino a 6 colori o in quadricromia.

Service for large quantities (minimum 50,000 pieces of the same code) and complex prints up to 6 colors or four-color printing.

Service für große Mengen (mindestens 50000 Stück eines Artikels) und komplexe Drucke bis zu 6 Farben oder im Vierfarbenverfahren.

Polpa PFAS Free
PFAS Free Bagasse
PFAS Free Zellstoff

PFAS Free

L'acronimo PFAS indica una vasta famiglia di sostanze perfluoroalchiliche utilizzate per aumentare le prestazioni di svariati materiali tra cui gli imballaggi alimentari. Ma se da una parte i PFAS aumentano la repellenza all'olio e all'acqua e la resistenza al calore contrastando usura e corrosione, dall'altra - una volta dispersi nell'ambiente - sono persistenti ed interferiscono con la salute umana.

La quantità massima di PFAS è limitata dall'Unione Europea e gli imballaggi alimentari sono da ritenere sicuri ma, possiamo eliminarli del tutto, ottenendo un materiale del tutto privo di sostanze perfluoro alchiliche. Come gli articoli della nuova linea Pfas Free che comprende piatti, insalatiere, vassoi, posate e monoporzione.

The acronym PFAS refers to a broad family of perfluoroalkyl substances used to improve the performance of various materials, including food packaging. On the one hand, PFASs increase resistance to oil, water and heat, thereby combating wear and corrosion. However, once they are dispersed into the environment, they are persistent and can affect human health. The European Union has imposed limits on the maximum allowable amount of PFAS, deeming food packaging safe within these limits. Nonetheless, it is possible to completely eliminate PFAS, resulting in a material entirely free of perfluoroalkyl substances. This is the case with our new PFAS-free product line, which includes plates, salad bowls, trays, cutlery and single-serve containers.

Das Akronym PFAS steht für eine breite Familie von perfluorierten Alkylsubstanzen, die zur Verbesserung der Leistung verschiedener Materialien, einschließlich Lebensmittelverpackungen, verwendet werden. Während PFAS auf der einen Seite dazu beitragen, Öl- und Wasserabweisung sowie Hitzebeständigkeit zu erhöhen und Verschleiß und Korrosion zu bekämpfen, verbleiben sie auf der anderen Seite in der Umwelt und beeinträchtigen die menschliche Gesundheit.

Die Europäische Union hat Grenzwerte für die maximal zulässige Menge an PFAS festgelegt und erachtet Lebensmittelverpackungen innerhalb dieser Grenzwerte als sicher. Dennoch ist es möglich, PFAS vollständig zu eliminieren, indem geringfügige, und so ein Material zu erhalten, das vollständig frei von perfluorierten Alkylsubstanzen ist. Dies ist der Fall bei unserer neuen PFAS-freien Produktlinie, zu der Teller, Salatschalen, Tablett, Besteck und Portionsbecher gehören.

Polpa di Cellulosa
Bagasse
Zellstoff

Polpa di Cellulosa

Fino a pochi anni fa la polpa di cellulosa era considerata un prodotto secondario e veniva trattata come uno scarto della lavorazione dello zucchero. Oggi viene finalmente utilizzata per la produzione di stoviglie ecosostenibili incarnando a pieno il principio di sostenibilità e di responsabilità per il futuro del nostro ambiente. Ci da stoviglie resistenti anche a olii e a alimenti umidi, idonee al forno a microonde, a quello tradizionale e al congelatore che sono inoltre compostabili in 90 giorni secondo la norma UNI EN 13432. Inoltre testiamo periodicamente i nostri prodotti presso laboratori accreditati per verificare il rispetto dei limiti di legge di PFAS ed altre sostanze chimiche.

Bagasse

Until a few years ago, bagasse was considered a secondary product and was treated as a waste from sugar processing. Today it is finally used for the production of eco-sustainable tableware, fully embodying the principle of sustainability and responsibility for the future of our environment. It gives dishes that are also resistant to oils and moist foods, suitable for microwave ovens, traditional ovens and freezers which are also compostable in 90 days according to the UNI EN 13432 standard. We also regularly test our products at accredited laboratories to verify compliance with legal limits for PFAS and other chemical substances.

Cellulosezellstoff

Bis vor wenigen Jahren galt Zellstoff als Sekundärprodukt und wurde als Abfall aus der Zuckerverarbeitung behandelt. Heute wird er endlich für die Herstellung von umweltfreundlichem Geschirr verwendet, das das Prinzip der Nachhaltigkeit und Verantwortung für die Zukunft unserer Umwelt voll verkörpert. Es entsteht uns Geschirr, das auch gegen Öle und feuchte Lebensmittel beständig ist, das für Mikrowellen, herkömmliche Öfen und Gefrierschränke geeignet ist und außerdem in 90 Tagen gemäß der Norm UNI EN 13432 kompostierbar ist. Außerdem testen wir unsere Produkte regelmäßig in akkreditierten Labors, um die Einhaltung der gesetzlichen Grenzwerte für PFAS und andere chemische Substanzen zu überprüfen.

Legno

I prodotti in legno naturale (pino, pioppo e betulla) sono l'ideale per chi desidera un prodotto speciale e del tutto ecologico. La materia prima non è trattata con nessuna sostanza aggiuntiva e ciò permette di realizzare posate, piatti, vassoi, contenitori del tutto sicuri a contatto con i cibi e biodegradabili al 100%.

Gran parte della materia prima deriva inoltre da foreste certificate FSC per una corretta gestione del patrimonio forestale e la tracciabilità dei prodotti derivati.

Wood

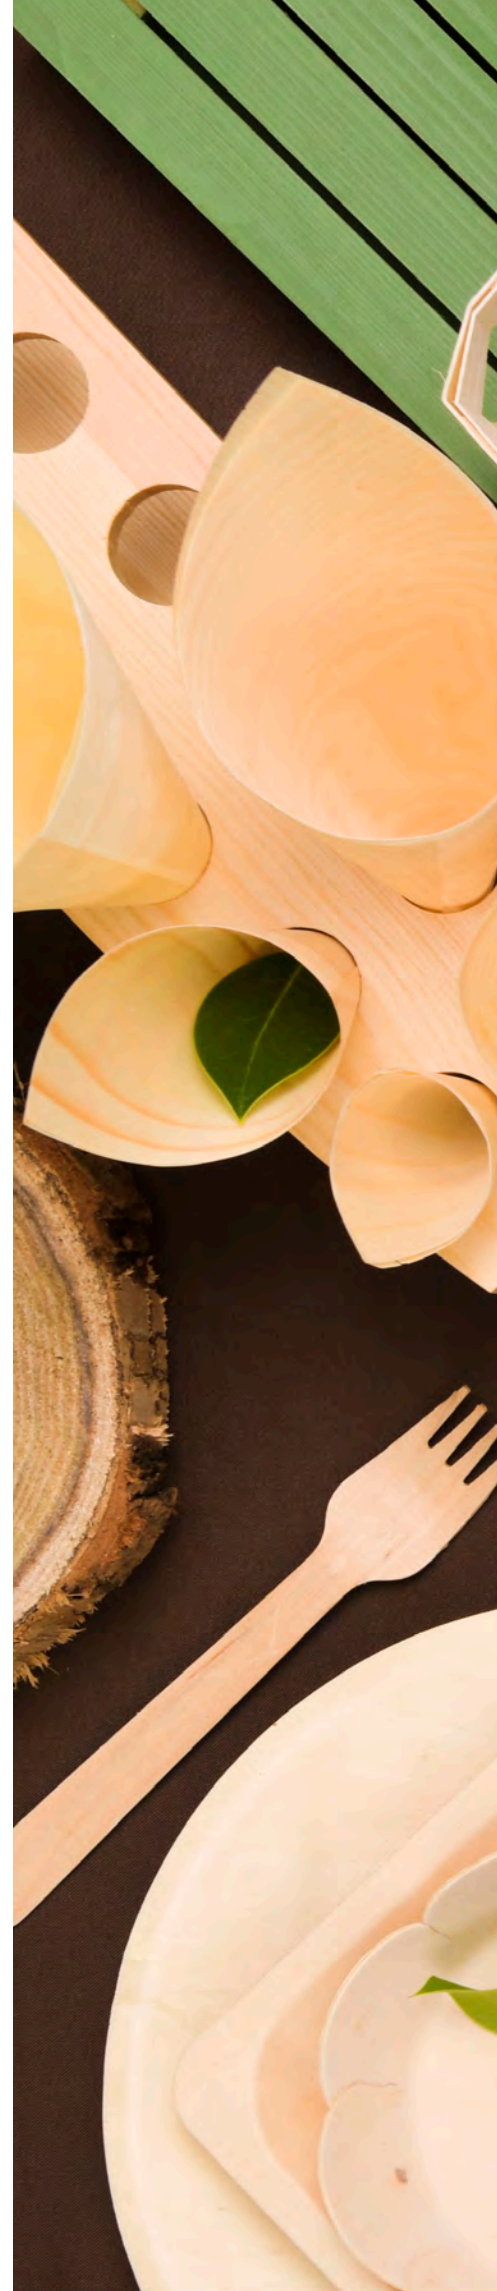

Natural wood products (pine, poplar and birch) are ideal for those who want a special and completely ecological product. The raw material is not treated with any additional substance and this allows the creation of cutlery, plates, trays, containers that are completely safe in contact with food and 100% biodegradable.

Much of the raw material also comes from FSC certified forests for proper forest management and traceability of derived products.

Holz

Naturholzprodukte (Kiefer, Pappel und Birke) sind ideal für diejenigen, die ein besonderes und vollständig ökologisches Produkt wünschen. Das Rohmaterial wird nicht mit zusätzlichen Stoffen behandelt, was die Herstellung von Besteck, Tellern, Tablettts und Behältern ermöglicht, die absolut unbedenklich für den Kontakt mit Lebensmitteln und zu 100 % biologisch abbaubar sind.

Ein Großteil des Rohmaterials stammt auch aus FSC-zertifizierten Wäldern für eine ordnungsgemäße Waldbewirtschaftung und Rückverfolgbarkeit der abgeleiteten Produkte.

Cartoncino
Paperboard
Pappe

Cartoncino

Il cartoncino offre grandi possibilità per il packaging alimentare risultando economico e versatile, soprattutto se laminato con film plastici o bioplastici. Ed è anche ecofriendly, dato che gran parte della materia prima è certificata FSC e in molti casi può essere riciclata nella raccolta della carta o addirittura compostata in impianti industriali. La maggior parte dei nostri articoli sono realizzati in fibra vergine per coniugare funzionalità (la fibra vergine è elastica e resistente e permette di avere ottime prestazioni anche con grammature basse) e sicurezza alimentare, dato che la pura cellulosa non subisce contaminazioni con oli minerali.

Paperboard

Paperboard offers great possibilities for food packaging, making it economical and versatile, especially if laminated with plastic or bioplastic films. And it is also eco-friendly, given that most of the raw material is FSC certified and in many cases it can be recycled in the paper collection or even composted in industrial plants.

Most of our items are made of virgin fiber to combine functionality (virgin fiber is elastic and resistant and allows excellent performance even with low weights) and food safety, since pure cellulose is not contaminated with synthetic substances.

Pappe

PAPPE bietet großartige Möglichkeiten für Lebensmittelverpackungen, wodurch sie wirtschaftlich und vielseitig ist, insbesondere wenn sie mit Kunststoff- oder Biokunststofffolien laminiert wird. Sie ist auch umweltfreundlich, da der Großteil des Rohmaterials FSC-zertifiziert ist und in vielen Fällen in der Papiersammlung recycelt oder sogar in Industrieanlagen kompostiert werden kann. Die meisten unserer Artikel sind aus Frischfaser gefertigt, um Funktionalität (Frischfaser ist elastisch und widerstandsfähig und ermöglicht eine hervorragende Leistung auch bei geringem Gewicht) und Lebensmittelsicherheit zu vereinen, da reine Zellulose nicht mit synthetischen Stoffen verunreinigt ist.

palettine da caffè 110 mm coffee stirrer 110 mm Rührstäbchen 110 mm								
cartoncino bianco white paperboard weiße Pappe			1.000	10	10.000			

Finalmente una palettina da caffè da smaltire nella raccolta carta! Provala subito: è realizzata da più strati di cellulosa pfas free con il giusto spessore e angoli smussati.
Abbinata ai bicchieri in cartoncino per un take away completamente riciclabile.
Finally a coffee stirrer to dispose of in the paper recycling! Try it now: it's made of multiple layers of pfas-free cellulose with the right thickness and rounded edges.
Pair it with cardboard cups for a completely recyclable take-away experience.
Endlich ein Kaffeerührstäbchen zum Entsorgen im Altpapier! Probiere es jetzt aus: Es besteht aus mehreren Schichten pfas-freier Zellulose mit der richtigen Dicke und abgerundeten Ecken.
Kombiniere ihn mit Kartonbechern für ein vollständig recycelbares Take-Away-Erlebnis.

Look originale per questa nuova serie di insalatiere in cartoncino FSC. La svasatura le rende speciali nell'aspetto ma anche più pratiche da riempire e più accattivanti da vedere. La forza di questa nuova serie non sta solo nell'aspetto: la laminazione interna e i coperchi sono in PP, un materiale adatto per il riempimento a caldo e per l'uso in vetrine riscaldate o forno a microonde. An original look for this new series of FSC cardboard salad bowls. The flaring makes them special in appearance but also more practical to fill and more appealing to look at. The strength of this new series lies not only in appearance: the internal lamination and lids are made of PP, a material suitable for hot filling and for use in heated display cases or microwave ovens. Ein origineller Look für diese neue Serie von FSC-Pappsalatschalen. Die Kegelform macht sie nicht nur im Aussehen besonders, sondern auch praktischer zu befüllen und ansprechender anzusehen. Die Stärke dieser neuen Serie liegt nicht nur im Aussehen: Die innere Laminierung und Deckel bestehen aus PP, einem Material, das sich für das heiße Befüllen und den Einsatz in beheizten Vitrinen oder Mikrowellenöfen eignet.

Esterno avana per un look naturale, interno nero per un aspetto elegante. Questa nuova serie renderà poke bowls, insalatone e piatti pronti più belli da vedere grazie al contrasto tra fondo nero e cibi colorati. Il cartoncino è laminato in PE per resistere ai grassi e all'umidità mentre il coperchio è in rPET; entrambi riciclabili rispettivamente nella carta e nella plastica. *Brown exterior for a natural look, black interior for an elegant appearance. This new series will make poke bowls, large salads and ready-made dishes more visually appealing thanks to the contrast between the black base and colorful foods. The cardboard is laminated with PE to resist fats and moisture while the lid is made of rPET; both recyclable respectively in paper and plastic. Außen Kraft für einen natürlichen Look, innen schwarz für ein elegantes Aussehen. Diese neue Serie wird Poke-Schalen, Salate und fertige Gerichte durch den Kontrast zwischen der schwarzen Basis und bunten Lebensmitteln optisch ansprechender machen. Der Karton ist mit PE laminiert, um Fette und Feuchtigkeit zu widerstehen, während der Deckel aus rPET besteht; beides ist jeweils recycelbar in Papier und Kunststoff.*

Distingui le tue preparazioni con una forma diversa e con una marcia in più: questa nuova miniserie di insalatiere si distingue per la forma quadrata e per essere compostabile. Sono in cartoncino avana laminato in PLA, la combinazione migliore per essere smaltite nella frazione umida assieme ai resti di cibo. Le trovi in 2 capacità con unico coperchio in PP. *Set your preparations apart with a different shape and an added touch: this new mini-series of salad bowls stands out for its square shape and compostability. They are made of PLA-laminated kraft cardboard, the best combination for disposal in the organic waste fraction along with food scraps. Available in 2 capacities with a single PP lid.* Hebe deine Zubereitungen mit einer anderen Form und einem zusätzlichen Touch ab: Diese neue Miniserie von Salatschalen zeichnet sich durch ihre quadratische Form und Kompostierbarkeit aus. Sie bestehen aus PLA-laminiertem Kraft-Karton, der besten Kombination zur Entsorgung im Bioabfall zusammen mit Lebensmittelresten. Erhältlich in 2 Größen mit einem einzigen PP-Deckel.

	PE1200W	insalatiera bianca white bowl salatschalen weiß	178x178 x60h mm 1200 ml	cartoncino + PET paperboard + PET pappe + PET				300	300	24

Dal frigo al forno: con queste insalatiere laminate in PET puoi porzionare gli alimenti, refrigerarli e poi riscaldarli in forno tradizionale o microonde o esporli in vetrine riscaldate.

From fridge to oven: with these PET laminated bowls, you can portion your food, refrigerate it, and then reheat it in a traditional oven or microwave, or display it in hot cabinet.
Vom Kühlschrank in den Backofen: Mit diesen PET-beschichteten Schalen können Sie Lebensmittel portionieren, kühlen und dann im herkömmlichen Ofen oder Mikrowelle erwärmen oder in Warmhaltevittrinen präsentieren.

L'intera serie è compostabile in impianti industriali grazie alla laminazione con soluzione a base d'acqua e alla finestra in acetato di cellulosa.
The series is compostable in industrial plants thanks to the lamination with water-based solution and the cellulose acetate window.
Die Serie ist dank der Laminierung mit wasserbasierter Lösung und dem Fenster aus Zellulose-Acetat in Industrieanlagen kompostierbar.

paletta da gelato 97 mm
ice cream spoon 97 mm
eislöffel 97 mm

cartoncino bianco
white paperboard
weiße Pappe

300 6 1.800

Finalmente una palettina da gelato riciclabile nella carta! Provala subito: è realizzata da più strati di cellulosa pfas free con il giusto spessore e angoli smussati. E quando hai finito il tuo gelato da passeggio, puoi smaltire tutto nella raccolta della carta. *Finally an ice cream spoon recyclable in paper! Try it now: it's made of multiple layers of pfas-free cellulose with the right thickness and rounded edges. And when you're done with your walk-around ice cream, you can dispose of everything in the paper recycling.* *Endlich ein recycelbarer Eislöffel aus Papier! Probieren es jetzt aus: Er besteht aus mehreren Schichten pfas-freier Zellulose mit der richtigen Dicke und abgerundeten Ecken. Und wenn du mit deinem Spaziergangs-Eis fertig bist, kannst du alles im Altpapier entsorgen.*

Bambù
Bamboo
Bambus

Bambù

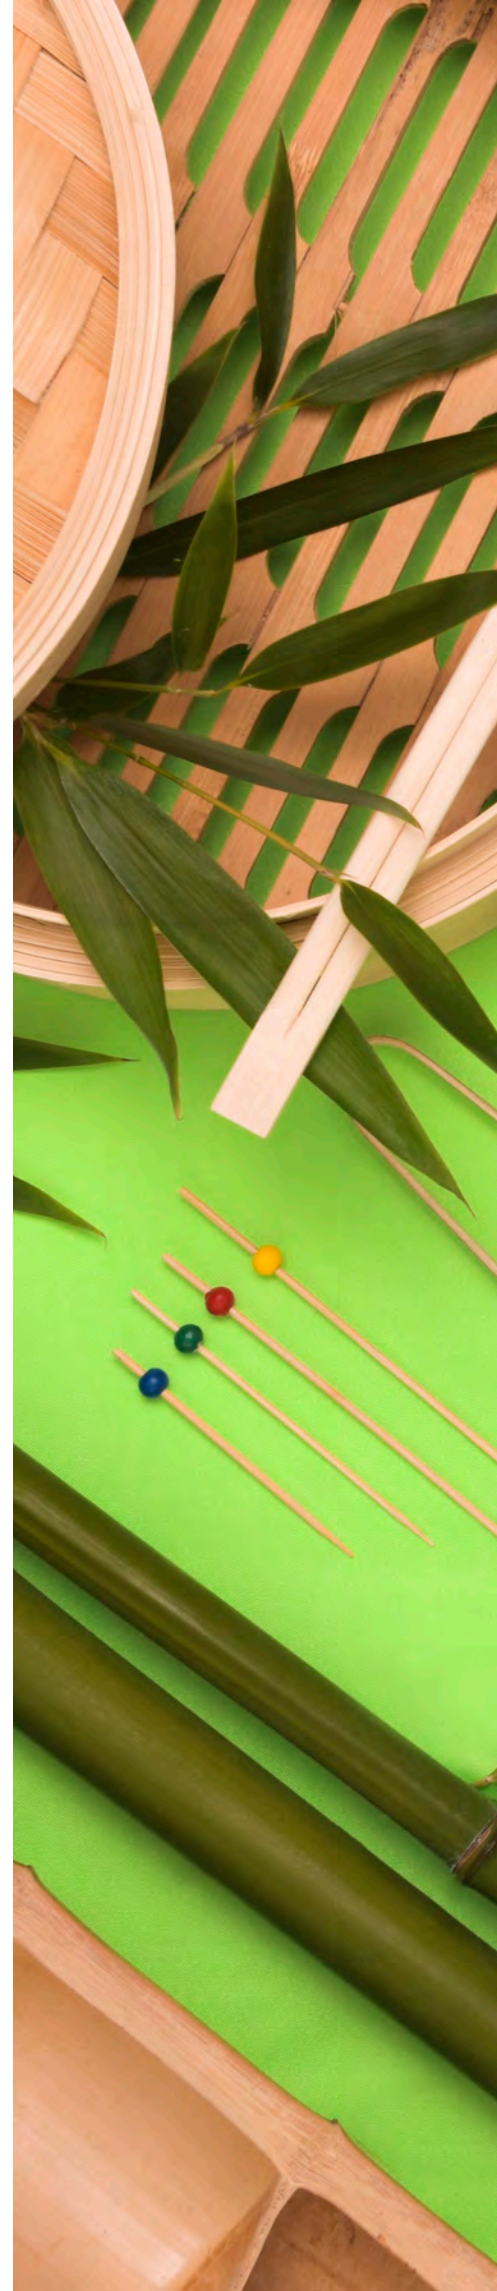

Il bambù è forse tra le piante più virtuose: cresce velocemente, non necessita di erbicidi o pesticidi, può essere coltivato ovunque. Una volta raccolta, inoltre, la materia prima non ha bisogno di grandi lavorazioni per essere trasformata essendo facilmente tagliabile e modellabile con vapore. Gli articoli che se ne ricavano sono rigidi e resistenti, ideali per svariati utilizzi a contatto alimentare. Una scelta eco-friendly che coniuga la praticità alla sostenibilità.

Bamboo

Bamboo is perhaps one of the most virtuous plants: it grows fast, does not require herbicides or pesticides, it can be grown anywhere. Furthermore, once collected, the raw material does not need extensive processing to be transformed as it can be easily cut and molded with steam. The resulting articles are rigid and resistant, suitable for various uses in contact with food. An eco-friendly choice that combines practicality with sustainability.

Bambus

Bambus ist vielleicht eine der tugendhaftesten Pflanzen: Er wächst schnell, benötigt keine Herbizide oder Pestizide und kann überall angebaut werden. Darüber hinaus erfordert das einmal gesammelte Rohmaterial keine umfangreiche Verarbeitung, um umgewandelt zu werden, da es leicht mit Dampf geschnitten und geformt werden kann. Die resultierenden Artikel sind steif und widerstandsfähig und für verschiedene Verwendungen in Kontakt mit Lebensmitteln geeignet. Eine umweltfreundliche Wahl, die Praktikabilität mit Nachhaltigkeit verbindet.

Foglia di Palma
Palm Leaf
Palmblatt

Foglia di Palma

L'impiego di foglie di palma per produrre stoviglie coniuga l'eleganza al concetto di sviluppo sostenibile e di biodegradabilità. I piatti e i contenitori in palma sono realizzati con materiale organico al 100% costituito da foglie di palma dell'India del sud, lavate e pressate attraverso un processo produttivo incredibilmente efficiente dal punto di vista di impiego energetico. Gli articoli che ne derivano sono piacevoli alla vista e al tatto, con texture sempre differenti e sono inoltre idonei per alimenti sia caldi che freddi e utilizzabili in microonde.

Palm Leaf

The use of palm leaves to produce tableware combines elegance with the concept of sustainable development and biodegradability. The palm dishes and containers are made with 100% organic material consisting of South Indian palm leaves, washed and pressed through an incredibly efficient production process from the point of view of energy use. The resulting articles are pleasing to the eye and to the touch, with always different textures and are also suitable for both hot and cold foods and can be used in microwaves.

Palmblatt

Die Verwendung von Palmblättern zur Herstellung von Geschirr verbindet Eleganz mit dem Konzept der nachhaltigen Entwicklung und biologischen Abbaubarkeit. Die Palmschalen und -behälter werden aus 100 % organischem Material hergestellt, das aus südindischen Palmblättern besteht, gewaschen und durch einen unter dem Gesichtspunkt des Energieverbrauchs unglaublich effizienten Produktionsprozess gepresst wird. Die resultierenden Artikel sind für das Auge und die Berührung angenehm, mit immer unterschiedlichen Texturen und sind auch sowohl für heiße als auch für kalte Speisen geeignet und können in Mikrowellen verwendet werden.

PLA CPLA

PLA CPLA

Il PLA (acido polilattico) e il CPLA (Pla cristallizzato) sono bioplastiche derivanti dagli amidi del mais e sono dunque 100% biodegradabili e compostabili. Le prestazioni sono del tutto simili a quelle di una normale plastica ma con PLA e CPLA è possibile abbassare l'impatto sull'ambiente soprattutto in fase di smaltimento. Il CPLA, evoluzione del PLA, ha inoltre elevato le prestazioni del materiale permettendo di realizzare stoviglie e contenitori da utilizzare con cibi e bevande tiepidi.

PLA CPLA

PLA (polylactic acid) and CPLA (crystallized Pla) are bioplastics deriving from corn starches and are therefore 100% biodegradable and compostable. The performances are very similar to those of a normal plastic but with PLA and CPLA it is possible to lower the impact on the environment especially during the disposal phase. CPLA, an evolution of PLA, has also increased the performance of the material, allowing the creation of dishes and containers to be used with warm food and drinks.

PLA-CPLA

PLA (Polymilchsäure) und CPLA (Kristallisiertes PLA) sind aus Maisstärke gewonnene Biokunststoffe und daher zu 100 % biologisch abbaubar und kompostierbar. Die Leistungen sind denen eines normalen Kunststoffs sehr ähnlich, aber mit PLA und CPLA ist es möglich, die Auswirkungen auf die Umwelt insbesondere während der Entsorgungsphase zu verringern. CPLA, eine Weiterentwicklung von PLA, hat auch die Leistung des Materials erhöht und ermöglicht die Herstellung von Schalen und Behältern für lauwarme Speisen und Getränke.

Nella serie di posate in CPLA non potevano mancare la paletta da gelato e forchetta e coltello imbustati singolarmente con tovagliolo. Come tutte le posate in CplA, resistenti ma anche compostabili.

In the series of CPLA cutlery, the ice cream spoon couldn't be missing along with fork and knife individually wrapped with a napkin. All sturdy, resistant but also compostable.

In der Serie von CPLA-Besteck durfte der Eislöffel nicht fehlen - robust und kompostierbar - sowie Gabel und Messer einzeln mit Serviette verpackt.

Riciclabile
Recyclable
Recyclelbar

Riciclabile

Nonostante la plastica sia stata messa in discussione dalla recente direttiva europea "SUP" - se correttamente gestita e smaltita - resta un valido alleato nel mondo dell'asporto e della ristorazione veloce e collettiva poichè garantisce igiene e sicurezza con un impatto ambientale relativamente basso. Le sue caratteristiche di robustezza e trasparenza sono note a tutti; forse è meno noto che i processi produttivi sono ormai stati raffinati fino a diventare estremamente sostenibili. Gli impianti di riciclaggio, inoltre, riescono a produrre materia prima seconda di ottima qualità, permettendo alla plastica di avere più vite a basso impatto con ridotta emissione di CO2.

Recyclable

Although plastic has been questioned by the recent European "SUP" directive - if properly managed and disposed of - it remains a valid ally in the world of take-away and fast and collective catering, guaranteeing hygiene and safety with a relatively low environmental impact. Its characteristics of robustness and transparency are known to all; perhaps it is less well known that production processes have now been refined to become extremely sustainable. Furthermore, the recycling plants are able to produce high quality secondary raw materials, allowing plastics to have more low-impact lives with reduced CO2 emissions.

Recyclbar

Obwohl Plastik durch die jüngste europäische „SUP“-Richtlinie in Frage gestellt wurde, bleibt es – wenn es richtig behandelt und entsorgt wird – ein wertvoller Bestandteil im Bereich Take-away und Fastfood, der Hygiene und Sicherheit bei relativ geringer Umweltbelastung garantiert. Seine Eigenschaften von Robustheit und Transparenz sind bekannt; weniger bekannt ist vielleicht, dass sich die Produktionsprozesse inzwischen zu einem äußerst nachhaltigen Produkt verfeinert haben. Darüber hinaus sind die Recyclinganlagen in der Lage, hochwertige Sekundärrohstoffe zu produzieren, die Kunststoffen ein umweltfreundlicheres Leben mit reduzierten CO2-Emissionen ermöglichen.

Servi salse e piccoli contorni, topping e granelle nella giusta quantità e nel giusto contenitore. Puoi optare per la versione contenitore + coperchio universale oppure con coperchio incernierato, perfetto se fai asporto. Le basi sono tutte realizzate in PP e quindi idonee anche a sughi e salse calde. Disponibili in 7 capacità. Serve sauces and small side dishes, toppings and grains in the right quantity and in the right container. You can opt for the container + universal lid version or with a hinged lid, perfect for takeout. The cups are all made of PP and therefore suitable for hot sauces and dips too. Available in 7 capacities. Serviere Saucen und kleine Beilagen, Toppings und Granulate in der richtigen Menge und im richtigen Behälter. Du kannst zwischen der Version Behälter + universellem Deckel oder mit Klappdeckel wählen, perfekt für Take-away. Die Behälter bestehen alle aus PP und sind daher auch für heiße Saucen und Dips geeignet. Erhältlich in 7 Größen.

Saccapoche
Piping Bags
Spritzbeutel

Non una semplice sac-a-poche!

Le nostre sac-a-poche Comfort sono prodotte con un metodo brevettato che le rende uniche: sono microruvide all'esterno, per garantire un'impugnatura sicura, sono lisce all'interno, per permettere la fuoriuscita del contenuto con la massima fluidità mentre gli strati intermedi donano resistenza anche alle pressioni più forti.

- 4 strati di polietilene di altissima qualità
- 80 micron di spessore
- Esterno flessibile e resistente alla presa
- Interno ultrasliscio per una perfetta fuoriuscita
- Saldature resistenti alle rotture
- Diverse colorazioni per identificare diverse preparazioni

Not just a simple pastry bag!

Our Comfort pastry bags are manufactured using a patented method that makes them unique: they are micro-rough on the outside to ensure a secure grip, smooth on the inside for the content to flow out smoothly, while the intermediate layers provide strength and resistance even under strong pressure.

- 4 layers of top-quality polyethylene
- 80 microns thick
- Flexible and grip-resistant exterior
- Ultra-smooth interior for perfect outflow
- Tear-resistant seams
- Available in various colors to identify different preparations

Nicht nur ein gewöhnlicher Spritzbeutel!

Unsere Comfort Spritzbeutel werden mit einer patentierten Methode hergestellt, die sie einzigartig macht: Sie sind außen mikrorau, um einen sicheren Griff zu gewährleisten, innen glatt, damit der Inhalt reibungslos fließen kann, während die Zwischenschichten auch den stärksten Drücken standhalten.

- 4 Schichten hochwertiges Polyethylen
- 80 Mikron dick
- Flexibles und griffiges Äußeres
- Ultra-glattes Inneres für perfektes Ausfließen
- Reißfeste Verschweißungen
- Verschiedene Farben zur Kennzeichnung unterschiedlicher Zubereitungen

Salviette
Wipes
Tücher

pal

Salviette

Le salviette pre-impregnate Pal sono formulate con diverse soluzioni per garantire pulizia e sanificazione con garanzia di efficacia contro sporco e microorganismi. La loro azione è battericida, fungicida, lieviticida e virucida per una sanificazione ad ampio spettro.

L'efficacia delle salviette Pal è valutata secondo gli standard EN così come i loro metodi di utilizzo. In particolare, possono vantare la EN 16615 che si concentra sull'efficacia della salvietta piuttosto che soltanto sul liquido valutando la loro sinergia in un test che simula in modo realistico l'uso pratico della salvietta.

Il materiale con cui sono realizzate è tessuto non tessuto di primissima qualità e per alcuni modelli è usata la tecnologia Tritex, una tipologia di panno che ha un'eccellente ritenzione della soluzione, basso rilascio di fibre ed efficiente rilascio della soluzione per garantire le massime prestazioni.

Wipes

Pal pre-impregnated wipes are formulated with different solutions to ensure cleaning and sanitization with guaranteed effectiveness against dirt and microorganisms. Their action is bactericidal, fungicidal, yeasticidal and virucidal for broad spectrum sanitization.

The effectiveness of Pal wipes is evaluated according to EN standards as well as their methods of use. In particular, they can boast EN 16615 which focuses on the effectiveness of the wipe rather than just the liquid by evaluating their synergy in a test that realistically simulates the practical use of the wipe.

The material with which they are made is top quality non-woven fabric and for some models Tritex technology is used, a type of cloth that has excellent solution retention, low fiber release and efficient solution release to ensure maximum performance.

Tücher

Die vorimprägnierten Wischtücher von Pal sind mit verschiedenen Lösungen getränkt, um eine Reinigung und Desinfektion mit garantierter Wirksamkeit gegen Schmutz und Mikroorganismen zu gewährleisten. Ihre Wirkung ist bakterizid, fungizid, levurozid und viruzid für eine Breitbanddesinfektion.

Die Wirksamkeit der Pal-Tücher wird nach EN-Normen sowie deren Anwendungsmethoden bewertet. Insbesondere haben die Tücher die EN 16615, die sich auf die Wirksamkeit des Wischtuchs und nicht nur auf die Flüssigkeit konzentriert, indem ihre Wirkung in einem Test bewertet wird, der die praktische Verwendung des Wischtuchs realistisch simuliert.

Das Material, aus dem sie hergestellt sind, ist hochwertiger Vliesstoff, und für einige Modelle wird die Tritex-Technologie verwendet, eine Art Stoff, der eine hervorragende Lösungsspeicherung, geringe Faserfreisetzung und effiziente Lösungsfreisetzung aufweist, um maximale Leistung sicher zu stellen.

HAND SANITISING

SURFACE DISINFECTANT

British Made

La linea PAL TX con Alcol comprende salviette pre-impregnate destinate al settore alimentare. Certificate come presidio medico chirurgico (PMC), sono idonee alla disinfezione senza risciacquo delle superfici destinate a venire in contatto con gli alimenti con un'efficacia ad ampio spettro. Un solo minuto di contatto elimina un'ampia varietà di batteri, lieviti, funghi, virus e micobatteri.

The PAL TX range with Alcohol includes pre-impregnated wipes for the food sector. Certified as a medical device by Italian legislation, they are suitable for the non-rinsing disinfection of surfaces intended to come into contact with food with broad spectrum efficacy. One minute of contact eliminates a wide variety of bacteria, yeasts, fungi, viruses and mycobacteria.

Die PAL TX-Reihe mit Alkohol enthält vorimprägnierte Wischtücher für den Lebensmittelbereich. Zertifiziert als Medizinprodukt nach italienischen Rechtsvorschriften. Geeignet für die trockene Desinfektion von Oberflächen, die in Kontakt mit Lebensmitteln kommen. Innerhalb einer Minute werden eine Vielzahl von Bakterien, Hefen, Pilzen, Viren und Mycobakterien eliminiert.

PALTECH

La linea Pal Tech è progettata per l'uso in ambienti industriali nei quali igiene, pulizia e disinfezione sono sempre necessari. Le salviette sono dermatologicamente testate e sono sicure sia per l'utilizzo su superfici che sulle mani. Realizzate in Tritex, sono morbide e resistenti, ideali per le quotidiane attività di pulizia e sanificazione.

Pal Tech line is designed for use within industrial environments where advanced hygiene and fast, effective cleaning and disinfection is needed. The wipes are dermatologically tested and safe for use on hands for the removal of uncured silicone, paint, grime and other tough substances. The smooth, strong Tritex wipe material is for regular cleaning and sanitising.

Die Pal Tech-Linie ist für den Einsatz in industriellen Umgebungen konzipiert, in denen fortschrittliche Hygiene und eine schnelle, effektive Reinigung und Desinfektion erforderlich sind. Die Tücher sind dermatologisch getestet und sicher für die Anwendung an den Händen zum Entfernen von nicht ausgehärtetem Silikon, Farbe, Schmutz und anderen hartnäckigen Substanzen. Das glatte, starke Tritex-Wischmaterial dient zur regelmäßigen Reinigung und Desinfektion.

Modo d'Uso

How to Use – Wie Man Die Tücher

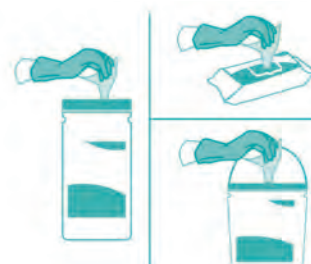

01 VALUTA IL RISCHIO RISK ASSESSMENT - RISIKOBEWERTUNG

Segui le linee guida della politica di valutazione del rischio relativa all'uso dei DPI
Please follow your agreed risk assessment policy guidelines regarding the use of PPE.
Bitte befolgen Sie Ihre internen Richtlinien zur Risikobewertung in Bezug auf die Verwendung von PSA

02 SCEGLI LA SALVIETTA WIPE SELECTION - WÄHLEN SIE DAS TUCH

Scegli il tipo di salvietta più adatta allo scopo
Choose the dispenser type and dispense the wipe.
Wählen Sie den Spendertyp, der am besten zu Ihren Anforderungen passt.

03 UTILIZZA LA TECNICA A «S» S-SHAPE TECHNIQUE - VERWENDEN SIE DIE «S» -TECHNIK

Pulisci la superficie seguendo la forma di una S, spostandoti dall'area già pulita a quella ancora sporca. Non ripassare con la salvietta usata su aree già pulite
Wipe the surface in an S Shape moving from clean to dirty. Do not go over the same area twice with the same wipe.
Reinigen Sie die Oberfläche in der Form eines S und bewegen Sie sich von den bereits sauberen in den noch schmutzigen Bereich. Gehen Sie nicht zweimal mit demselben Tuch über denselben Bereich.

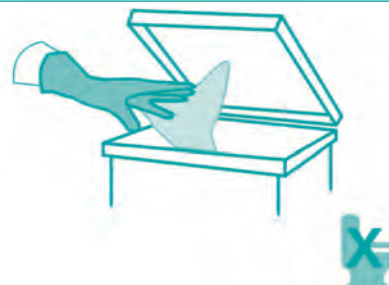

04 PRENDI UNA NUOVA SALVIETTA FRESH WIPE - NEHMEN SIE EIN NEUES TUCH

Utilizza una nuova salvietta se quella vecchia risulta sporca o asciutta
Use a fresh wipe if your wipe becomes soiled or dry.
Verwenden Sie ein neues Tuch, wenn das alte schmutzig oder trocken ist.

05 SMALTISCI CORRETTAMENTE DISCARD - ENTSORGUNG

Getta le salviette usate nel contenitore adatto seguendo le indicazioni delle autorità locali
Discard used wipes in the appropriate waste bin following your local agreed guidelines.
Entsorgen Sie die gebrauchten Tücher in einem geeigneten Behälter gemäß den Anweisungen der örtlichen Behörden.

06 LASCIA ASCIUGARE LET DRY - TROCKNEN LASSEN

Lascia asciugare completamente la superficie pulita prima di utilizzarla; conserva la confezione delle salviette ben chiusa.
Allow the surface to dry before use. Keep pack tightly closed when not in use.
Lassen Sie die saubere Oberfläche vor Gebrauch vollständig trocknen. Halten Sie die Packung mit den Tüchern bei Nichtgebrauch fest verschlossen.
